WELCOME ABOARD

On behalf of the officers and crew of the JS Takanami ,I would like to extend a sincere welcome to each of you .

The JS Takanami, commissioned in March 2003, is the first ship of Japan's Takanami class multi-purpose destroyer . Among our many weapon systems, we also can carry a helicopter that is capable of conducting anti-ship and anti-submarine warfare missions, which makes this ship even more powerful.

The Takanami class destroyer was designed with an extensive automated computer system that operates the combat and main propulsion systems. Because of this automation the amount of labor required operate the ship is reduced.

The mission of the JMSDF is to provide protection for Japan by defending the seas surrounding the nation as well as , provide security for Japan's sea lines of transportation that are used by numerous ships from around the world . Everyday , through strict discipline and training , we carefully perform this mission.

While you are on today's tour, all crew members will be standing by to assist you and answer any questions you may have . Please do not hesitate to approach and talk to them. I hope that you enjoy your time visiting this ship and that the tour will enhance your understanding of the JS Takanami and most of all the JMSDF
